this attempt they were partly suc

In this attempt they were partly suc-sesful. It was shown from documentary vidence in the files of the association, which the committee had acquired by subpens, that its officials were instru-mental in blocking an attempt last sum-mer to have the President revive the Puel Administration; that the associa-tion had paid the salaries of several statisticians of the Geological Survey, amounting in all to about \$5,000, to pub-lish reports weekly on coal production.

amounting in all to about \$6,000, to publish reports weekly on coal production and that the forms of these reports were changed at the request of a member of the association located in Illinois.

It was disclosed from their records also that the association had formed the "governmental relations committee," on which operators, wholesalers and retailers in coal were represented for the purpose of watching legislation; that they indorsed and opposed various bills; that they presented their views to committees in hearings, and above all, that they were at all times opposed to any legislation for governmental regulation of the coal industry.

The committee delved fully into the financial accounts of the association, disclosing that in three years it has collected about \$1,250,000 to support its Washington office and that it now has a balance of \$250,000, all its funds being raised by subscriptions among the operators.

operators.

Asked to explain why they located their headquarters in Washington rather than in some coal centre, Vice-President Morrow said it was partly to avoid possible jealousy among their members, which he said would be aroused if they were in a coal centre, and partly because there are so many governmental agencies in Washington like the Interstate Commerce Commission, the Federal Trade Commission and others whose activities are of vital interest to coal operators.

Morrow Edges Out of Trap.

Mr. Morrow admitted they had drafted

aking a fight against it.

making a fight against it.

Mr. Morrow used the incident of coal purchases by the Shipping Board to illustrate what he termed the evils of Government management of private industry. He said the Shipping Board did not have the foresight to make centracts for coal and was forced to may as much as \$21 a ton for it because of rangely conditions.

taission of New York, which had a contract, could not get coal and was rend to tay in the open market."

The was because of the breakdown in transportation, said Mr. Morrow. "Why do you always fall back on the transportation breakdown to exhibit something in which it seems to the committee the coal operators are to blame." asked Senator Edge.

'I don't," replied Mr. Morrow. "I am trying to explain the situation to you so you will know more about the coal situation than you seem to after studying it all summer."

'Master Mind' Barred From Witness Stand by Washington Judge.

IS HELD FOR TRIAL

Defence in Bond Theft Suit Comes to a Sudden Close.

State Claims Investors Lost \$5,000,000 Through Wall Street 'Ring.'

Special Desputch to THE NEW YORK HERALD New York Herald Bureau, Washington, D. C., Dec. 22.

Picturing the directors of the Wall Street bond thefts as the evil genius which brought to investors a loss ap-

Mr. Morrow admitted they had drafted some of the priority orders issued by the I. C. C. because they believed it was for the general good of the situation, which they insisted justified alarm and called for Government action. All efforts on the part of the committee, however, to wring an admission from Mr. Morrow that they wanted these priority orders to release coal men from their contracts were met with flat denials.

He said operators scrupulously kept their contracts so far as they could and at the same time comply with the priority orders. Both Morrow and Col. Wentz admitted there was profiteering on the part of many coal men, but denied that the coal association either encouraged it, was responsible for it or could have prevented it. The function of the association, it was responsible for it or could have prevented it. The function of the association, it was stated, was entirely outside the realm of prices.

Many letters in the files of the associations were read into the record by Senator Kenyon, Iowa, showing that the coal operators fear Government control if not Government ownership of the coal industry and that they are making a fight against it.

Mr. Morrow used the incident of coal of the priority orders are government ownership of the coal industry and that they are making a fight against it.

Mr. Morrow used the incident of coal cases and avoid adjournments which necessitate repeated appearances of policemen who might otherwise be attending to their duties.

Arnstein, David W. Sullivan, Norman S. Bowles and W. W. Esterday.

To-morrow will be given over to closing argument by the United States and the defence of Arnstein and the other defendants through Attorneys Fallon of New York and T. Morris Wampler. It is practically certain the jury will receive last instructions and deliberate before 3 o'clock to-morrow afternoon with a possible verdict by night.

afternoon with a possible verdict by night.

The defence surprised the court with the announcement that no further withnesses would be examined in its behalf. The arrest of Isadore "Nick" Cohen here Tuesday night as an alleged accomplice of Arnstein and the other accused men was the occasion of heated argument by counsel for the defence when court convened this morning.

Mr. Fallon stated that the jury had been prajudiced by press reports of Cohen's arrest, and asked that each luryman be asked if he had read the

wernment stry. He said force on the said of the said of the said of panicky conditions.

"The purchasing agent of the Shipping Board did not even take the trouble to walk into our office to see if we could help him," said Morrow, "and, of course, did not try to make a contract."

"Then it was advantageous to hay a contract was it?" saked Senator Edge. "It was," replied Mr. Morrow.

"How was it then," asked Senator Edge.

"It was," replied Mr. Morrow.

GRIEF FOR MARTYR HUSBAND CRIME UNCHECKED DROVE MRS. LEE TO SUICIDE

Officials Discard Other Theories in Death on Beach of

Although chemists who are making scientific examination of the vital organs of Mrs. Penelope Bond Lee, whose body was found Monday night on the beach at West End, near Long Beach, have not completed their analysis, the conviction became firmer yesterday that ahe had killed herself. Justice of the Peace Edward T. Neu of Lynbrook, acting Coroner for Nassau county, reiter erated this as his unofficial opinion, and said there is little doubt that Mrs. Lee was suffering from melancholla, as a result of her prolonged mourning for her husband, the late Dr. John A. Lee, who died a martyr to his research work with the X-ray.

NEW JERSEY CALLS BY MOTOR PATROL | CRIME CONFERENCE |

Governor Asks Sheriffs and

Less than six have been arrested in the print last week.

Three men were arrested in the print shop of Gus Schwenderman, at 315 East Twenty-second street, and charged with burglary. Schwenderman said they were in the act of holding him up for a weekly payroll of \$900 when detectives entered and arrested them. The prisoners are Joseph Corcio of 212 Lafayette street, Brooklyn; Carmine Lanese of 172 Mulberry street and Joseph Deargrosa of 634 Jerome street, Brooklyn. The police said they searched the men and found a watch, a locket, an overcoat and a suit which were part of the loot taken earlier in the afternoon in a robbery at the Grand Metal Spinning Company, Lafayette and Worth streets.

No Evidence Against Pickups. gion.

"I shall recommend," said Gov. Edwards in Jersey City yesterday, "thorough organization to keep criminals out of the State and to pick up and care for those already here. I want to get something done in the country districts, and I hope to get the men of the American Legion to help in city and country. I shall let the conference work out its own plan."

At the same time William L. Dill, head of the State Motor Vehicle Department, asked the police of all cities to enforce strictly the State motor law requiring license plates to be kept clean and easily readable at all times. He pointed out that bandits are using automobiles, and that frequently their identity is lost because of obliteration or concealment of number plates.

Hackensack police arrested Christopher Falls yesterday and declare that he has confessed that he faked the hold-up which he reported last Saturday night when he walked into the police station with a cut on his head and said he had been robbed of \$600 belonging to his

when he walked into the police station with a cut on his head and said he had been robbed of \$600 belonging to his uncle's market, of which he has been the manager. The police say that Falls confessed that he hid the money about the store and then hit himself on the head to make it look as if a holdup had been committed.

ROBBERS GET \$17,500.

Barner, N. D., Dec. 22.—Robbers blew the safe in the State Bank here last night and escaped with \$2,500 in cash and more than \$15,000 in negotiable se-curities.

Sound at the Core

THE fundamental soundness of America is a guarantee for better business in 1921.

During the present period of economic readjustment, business men are putting their houses in order in confident preparation for the period of better business, soon to come.

The New York Central Lines, which carry one-tenth of the railroad traffic of this country, are ready to perform their full share of the work ahead.

Every business man knows the part that bad transportation can play in aggravating business troubles. Every business man knows how, at times in the past, he has been embarrassed and hindered by freight congestion and slow deliveries.

Sound transportation conditions are a stimulus to business, just as are sound banking conditions. Transportation and credit are the cornerstones of good business.

Substantial progress has already been made in rehabilitating the New York Central Lines from the rack and tear of War demands. New cars and locomotives are now coming into service; much has been done in overhauling existing equipment; and the New York Central Lines are, today, in position to carry even a greater share of the burden of transportation than ever before.

New York Central preparedness means case of transportation, which invites fuller production and business growth over a wide and industrially dominant territory.
